🗨️ We are responsible for those we tamed: **Take care of animals (x10)** View journal

Richie was such a good dog! I wonder if he managed to escape? I hope that he did not suffer... I can not throw this thought out of my head. Yesterday Red Larry talked about the radio program he heard while begging in front of the restaurant. They said that after the bombing of the center, these psychos used some gas, and those who remained in the city died in terrible agonies. It turns out that my mother and father were lucky - they died almost instantly. But Richie... However, let's not think about the sad. It's time to do something useful not only for yourself! When I was walking along the street, I heard someone squeal and squeak - it seems it's a little puppy! It is necessary to find him, feed and warm him - no one will help him except me.

The game is not really a life sim, but a clicker. Linear plot progression that dictates what happens to you that doesn't involve clicking, and no real ending to speak of. Played around 80 minutes and unlocked all achievements bar a hidden, the last hour was basically clicking the same option 99 times, refreshing health, and then doing it again, etc etc.. Klicker. Pretty Boring. Well the game looked like a good management game about the survival of a little girl, but the truth is that the game is just a clicker and in the most boring way =(

Sad. So I installed this game\u2026 it\u2019s not what I thought it would be but it\u2019s still quite fun! I prefer to tag this as \u00abI want some updates but it\u2019s still fine for now\u00bb.. Besides really good music and eye candy visual style this game gave me one of the hardest riddle of our time: where\u2019s the poor little girl\u2019s shoes? Why is she standing out there barefoot if she has had her feet warm in some nice sketchers in the video at the beginning? No answer.

To be serious - I liked the game.. Aaaaaaaaaaand after some clickity-click-click on the screen I finally figured it out and Ashley is finally not dead! And it\u2019s always pleasurable to have nice good achievements in store. And it has a plot that even keep my attention.

It's not for everyone. Not a typical survivor nor a clicker. More like something in between. Interesting style and atmosphere.

P.S.: Wonderful music!. The concept seems interesting but well all you do is click work until health or food is empty refill those keep clicking money gain. Then you get enough to upgrade something then it's all over again. There's basically no story as you "progress". You don't get any options at all rather a guide click 10 times here for empathy. I rather recommend you to get a clicker game for free than this one.. Unless you are an extreme hardcore fan of survival games and management game and absolutely need a fix from something, do not bother with this title. It is sad however, If the developers had spent a bit more time on this and fleshed it out some more it would actually be a good game, or rather it could be.

Unfinished artwork: Buying the Suit (top tier clothing) the character does not change in appearance at all, buying the bike, the car or apartments do not change any background, nor does the tent or similar things change how you see things.

Severely lacking in story: The "quests" you get to beg for food or work with dogs are the only source of story, once the quests are done it is done, and when you finish the last quest, you suddenly have a husband and children. My point being that as a survival "Story" it has next to nothing in this department, I was expecting more story that's for sure.

Like chance for a lethal event by begging for food by being tricked by a stranger, or take an overdose with the pills from the street which is a way to increase your health meter, or being arrested. Things like this would have made the game better.

So sad, I had so high hopes for this game but it simply falls dead.. Great visual part! 5 frozen exhausted starving girls out of 5!
To be clear: it's more like a mix of resource-management and clicker, but really fun and entertaining one.
Really liked that game contains a plot in a form of a diary - cute.. Ashley: The Story of Survival has an interesting premise and tagline. When reading the description, I was reading for a drama RPG/Simulation game with interesting choices to make as the story unfolds. Unfortunately, this is a clicker. You choose different tasks over the course of a day to perform and that raises one of three bars (Food, Health, and Comfort). You also perform tasks to earn Money, and Respect. You can unlock different tasks as you earn money and respect, which increase the rate at which you gain money, respect, food, health, or comfort.

Once you realize there are not real choices, the game becomes boring. I can't recommend this game, as there are better clicker games out there, and better RPG/Simulation games.

Achievement Quest: This is an easy 100%. There are no hard choices in the game to make. Continue to advance and try to get "Manage a company" employment as soon as possible. Once you have that, you can earn money to buy the villa, and the spa salon.
